

Are You Fit Enough to Make the Grade?

CPM Project 2016

Collins, Mellissa M

1/25/2016

Introduction

A police officer's physical fitness does directly relate to their job performance.

"In the United States, more than 40% of police officers, firefighters and security personnel are obese, the highest prevalence of all professions, according to a Wall Street Journal analysis of data from the American Journal of Preventive Medicine. Obese was defined as having a body mass index of 30 or above. Force Science research has proven in experiments with street-level personnel...today's average officer can be physically depleted in less than sixty seconds of full out exertion." (Force Science News #276: Call to action in the "Battle of the Bulge" (n.d.). Retrieved November 12, 2015, from <http://www.forcescience.org/fsnews/285.html>) If an officer is involved in an altercation and calls for help and, if it takes more than sixty seconds for back up to arrive, the officer's life, or the citizens they are trying to protect, could be in danger.

The South Carolina Criminal Justice Academy (The Academy) is responsible for the training and certification of all law enforcement officers in South Carolina. In FY 2013-2014, there were sixteen Basic Law Enforcement classes offered. Every three weeks a class will graduate on Friday and a new class of sixty five students reports Sunday. There were approximately 830 candidates presented for training, and of those attending, 693 graduated. The demand throughout the state for law enforcement officer training is constant and ever increasing. If a candidate receives a failing grade on any written test or a proficiency test, they are dismissed from training and only allowed to recycle one time. Having to recycle candidates uses additional seats in future classes, causing even more delays for training opportunities for agencies. There are other reasons for departures from training; some include personal issues, medical, illness, safety violations or voluntary withdrawal.

Physical fitness is important to the safety of the officers and the citizens they protect. During the 12 week training program, the Academy is responsible for the candidate's overall health and well-being. Upon entry into the Academy, each candidate must run the Physical Abilities Test (PAT), comprised of running a timed obstacle course which measures a total of 870 feet (290 yards/265.2 meters). The course consists of nine individual tasks that are viewed as being essential (physical) job tasks for law enforcement officers. The test consists of:

- Running
- Jumping (low hurdle)
- Climbing Stairs
- Low Crawling
- Jumping (broad type)
- Climbing a Fence (Chain link/four feet)
- Climbing through a Window
- Moving/Dragging a Weight (150 pounds) 20 feet
- Changing Direction on the Run

The maximum time allowed is two minutes and six seconds (2:06). Failure to complete the PAT in the time allotted is considered a failure and will result in the candidate's second attempt in three weeks upon entry of the next Basic Law class. If the candidate fails to successfully complete the PAT the second time, the student is dismissed from training and is required to

return back to their agency for a minimum of 30 days before they can be recycled for a third attempt. This is an opportunity for the agency to work with their candidate to improve their physical condition.

Upon successful completion of the PAT test, candidates take a battery of nine written tests that covers the following subject matter: Legal, Pressure Point Control Tactics (PPCT), Interrogation, Confession, Miranda Rights, Crime Scene and Physical Evidence, Domestic Violence and Behavioral Science, Communication, Patrol Procedures, Law Enforcement Tactics and Operations, Drug Enforcement, Collision Investigation, Hazardous Materials, Uniform Traffic Summons, Data Master Transition (DMT), Driving Under Influence/Standard Field Sobriety Testing (DUI/SFST). Candidates also have to pass Proficiency Tests that include PPCT (Pressure Point Control Tactics), Oleoresin Capsicum Spray (OC Spray), Firearms, Driving, DMT (Data Master Transition) and DUI/SFST (Driving under the Influence/Standard Field Sobriety Test). These proficiency tests are skill tests that check the candidates' adeptness in each area.

Research Objective

The intent of this project is to determine if a candidate's physical fitness impacts their success academically and physically during training at the Academy. This will be accomplished by comparing the time of the PAT to the numeric written tests scores and the pass rate of the proficiency tests. The averages will be compared to see if there is a trend to prove that one's physical fitness does affect success during their training.

Data Collection

The goal of the data collected is to determine if physical fitness upon entry and during the twelve week training class will improve a candidates overall success rate. This data consists of sixteen Basic Law Enforcement classes which were collected from class rosters for the Fiscal Training Year 2013-2014. The agencies represented consist of sheriff's offices, local police departments, State agencies, college police departments, airport and medical facility police departments. The original rosters provide students names, agency, gender, EEOC, fulfilled tests, pass, fail or numeric grade of written tests. The student's names, Gender and EEOC have been removed from the data provided. Pareto tables are used to illustrate the results of the data. The total number of candidates used in this data is 830.

To determine if agencies put emphasis on physical fitness prior to attending the Academy and afterwards, a survey was sent to agencies throughout the state. 552 surveys were sent out, a total of 233 people responded. A response rate of 42%. The survey asked the following questions:

1. Does your department require a physical fitness evaluation for Class 1 officers at the time of hire?
 - a. If yes, what are the criteria/standards?
2. Once hired, does your department offer physical fitness training in an attempt to prepare the candidate for the Academy?

3. Does your department have physical fitness standards for current (already certified) Class 1 officers?
 - a. If yes, what are the standards?
4. After graduating from the Academy, does your department offer assistance in maintaining physical fitness? (Ex: Gym memberships, etc.)
5. If your department has physical fitness standards for Class 1 officers, is there a policy/procedure in place that handles those that are non-compliant?
 - a. If an officer is unable to become compliant with physical fitness standards what is the outcome? (ex: loss of pay, demotion, termination)

Data Analysis

Of the 830 candidates used in this data analysis, the average PAT time was 1:32. The fastest time recorded was 1:02 with the slowest being 3:44. The PAT time was then stratified in ten second intervals: 1:00-1:09, 1:10-1:19, 1:20-1:29, 1:30-1:39, 1:40-1:49, 1:50-1:59 and 2:0-2:09. Averages for written test scores were obtained in each incremental segment. Data was not used for those over 2:09 because 2:07 and higher is considered a failure. Those candidates can be presented at a later date to be recycled back into the program.

PAT Time	Number of Candidates	Range of Written Test Scores	Average Number of Candidates With a Passing Score of 70 or Higher
1:00-1:09	43	82.23-98.67	100%
1:10-1:19	170	64.00-98.50	98.82%
1:20-1:29	243	54.00-98.22	96.71%
1:30-1:39	168	60-98.89.00	98.21%
1:40-1:49	117	64.00- 97.78	98.29%
1:50-1:59	60	75.33-96.00	100%
2:00-2:09	15	81.11-93.33	100%

The results of the written test scores compared to PAT times failed to show a correlation between the two.

The proficiency (skill/competence) training was then compared. The average of the PAT time for the officers that passed the first time was compared to officers that had a second attempt to the officers that failed.

	Average PAT Time		
	PPCT Proficiency	Firearms	Driving
Pass - First Attempt	1:2872	1:29	1:2842
Pass - Second Attempt	1:38	1:46	1:40
Fail	1:4314	1:416	1:53

The results are charted below:

Proficiency training was compared to PAT times, the candidates that had the faster PAT times were more successful passing the proficiency tests than those with slower PAT times. The degree of physical fitness a candidate has does appear to affect their ability to pass the proficiency tests.

When comparing the averages of the PAT time of those who did not graduate compared against those that graduated, the results showed once again, those that graduated had a faster PAT time than those that did not graduate. The average PAT time for the candidates that graduated was 1:29 compared to those that did not graduate was 1:50. Proficiency tests are required for successful completion at the Academy, so physical fitness may be a moderate predictor of overall success.

Of the 830 candidates used for this data, 138 did not graduate. This is an average loss of sixteen percent of the candidates. The average PAT time for proficiency skill tests (PPCT, Firearms and Driving) failures was 1:50. Statistics taken from the survey indicated 40.36% of departments responding require a fitness evaluation at the time of hire for Class 1 officers, but only 36.77% offer physical fitness training in an attempt to prepare their candidate for the Academy. Only 19.73% stated that their agency has physical fitness standards for current Class 1 officers, although 52.02% of the agencies do offer assistance to maintain physical fitness. (Ex: gym memberships, etc.)

Physical Fitness Standards

Q2 Does your department require a physical fitness evaluation for Class 1 officers at the time of hire?

Answered: 223 Skipped: 0

Answer Choices	Responses	
Yes	40.36%	90
No	59.64%	133

Physical Fitness Standards

Q7 After graduating from the Academy, does your department offer assistance in maintaining physical fitness? (ex., gym memberships, etc.)

Answered: 223 Skipped: 0

Answer Choices	Responses	
Yes	52.02%	116
No	47.98%	107
Total		223

One of the agencies interviewed was the Lancaster County Sheriff's Office. The agency has their own PAT course set up at their agency identical to the Academy's adopted standards. They also offer gym facilities for their officers to use and their Class 1 officers have to run the PAT annually. Failure to complete the PAT in 2:15 or less, results in immediate termination. Lancaster County Sheriff's Office presented thirteen candidates for training to the Academy during the time this data was collected. Their average PAT time was 1:28 and all thirteen candidates successfully completed training and graduated.

Anderson Police Department also requires their candidates to complete the Academy's PAT course at the time of hire. They also offer physical fitness training to prepare their candidates for the Academy. The average candidate from Anderson Police Department completed the PAT course in an average of 1:25. They presented fifteen candidates for training and all fifteen graduated.

Florence County Sheriff's office responded to the survey that they do not require a physical fitness evaluation and do not offer physical training in an attempt to prepare the candidate for the Academy. They presented seven candidates for training and four were successful with an average PAT time of 1.50.

Even though some agencies do not prepare their candidates physically for the Academy, such as Lexington County Sheriff's Office, they have high graduation rates. They presented ten candidates and nine graduated. One voluntarily withdrew on day one. Their average PAT time was 1:28.

The SC Department of Mental Health also stated they do not offer physical training in an attempt to prepare the candidates for the Academy. They presented fifteen candidates for training. Of the fifteen presented for training, eleven graduated. The average PAT time for was 1:39.

¹Responses from the survey reveal those agencies that require a physical fitness evaluation for Class 1 officers at the time of hire had a 85% graduation rate. Of the candidates that were not given a physical fitness evaluation at the time of hire, only 74% graduated the Academy.

Recommendations and Implementation Plan

During training at the Academy, candidates run 12 minutes daily from week 1 to week 5. Week seven through week twelve, candidates prepare for the three mile challenge run. This run consists of running three miles in under twenty five minutes. There is a gym facility open for all candidates to use while attending the Academy. The following action steps are recommended to address the importance of presenting physically fit candidates to the Academy for training and maintaining that fitness.

¹ This data may have changed slightly. Fiscal Year 13-14 data was used to determine the number of graduated candidates to the number of departed. The survey was sent out in November 2015. Hiring policies may have changed from FY 13-14.

Action Step 1: Notification

A letter from the Director of the Criminal Justice Academy notifying all agency heads of the importance of physical fitness for candidates and show the success rate of those that are physically fit compared to those that are not. The letter would state that we strongly encourage the departments to present physically fit candidates for training for successful completion. Those candidates that cannot pass the PAT time of 2:06 will be sent home on day 1 to be recycled at a later date. If they fail the PAT a second time they cannot be re-presented for training for one year.

Action Step 2: Nutrition

Our cafeteria does a good job preparing meals for the candidates with several options. Laura Stepp Registered Dietitian, Certified Diabetes Counselor and ACE Certified Health Coach at Lexington Medical Center, was interviewed. The food choices we offer while attending the Academy need to be changed slightly. We should only be serving intact whole grains such as brown rice and barley. Baked potatoes are great and full of nutrition as long as it is not smothered in butter and sour cream. French Fries are ok, but should be baked and not fried. These provide iron, vitamin c and potassium. Vegetables need to be the main focus of the dish. They help fuel the body and help it recover. We should offer a salad bar daily with lots of raw vegetables. Vegetables help in the digestion of the meat. The meat proteins we serve, such as chicken, would only be baked or grilled. Beans are an outstanding substitute for meat. Protein can also come from nuts and eggs. Fruits are important because they help absorb iron from animal proteins and help the body recover as well. Meat should be the smallest item on the

plate, on average a male should only have 6 ounces of meat for their meal. We should offer skinless grilled or baked poultry and increase how many times fish is offered. Pork tenderloins or pork tenderloin chops are healthy alternatives as well. Only lean red meat and no hamburger meat at all. Ground turkey could be substituted for the ground hamburger. Low fat milk is a wonderful recovery food and should be offered at every meal. This could be implemented immediately because a diet menu is offered for lunch each day, which conforms more to the guidelines suggested by Ms. Stepp. The costs should drop since we would be making only one diet menu each day instead of a diet menu and a regular menu.

Evaluation Method

In order to evaluate the results of these action plans, the Registration Manager will keep quarterly reports comparing the PAT times to test scores, utilizing the same methods used to compile the data for this research project.

Summary

The need for training for Law Enforcement officers is constant and ever increasing. Physical fitness is important for training and the career of the law enforcement officer and the citizens they protect. The key findings of this study did show candidates presented for training that ran the PAT faster were more successful on proficiency testing. The candidates with PAT times of 1:40 and under also had a higher graduation rate. The only attainable recommendations would be to encourage agencies to add fitness training, which could be as simple as running, and changing the diets of the candidates while they are in attendance.
